ABOUT ME

Experienced Software Engineer with a demonstrated history of working in area of information technology and services.

WORK EXPERIENCE

[06/2022 – Current]

Robotic Process Automation Engineer(RPA) & Infrastructure Automation (IaC)

RWE (RWE Supply & Trading CZ, A.S)

City: Prague

Country: Czechia

RPA

My primary responsibility is to conduct proof of concepts for new automation opportunities, design, develop and test(both integration and user acceptance testing) the solution before deploying into production.
Beside working on new projects, I also work on process improvement where I redesign already existing solutions in a such a way that they become more resilient, efficient and robust.

In my current work, I am training my colleagues on RPA best practices, how to effectively use automation tool capabilities such as the use of UiPath REFramework, orchestrator queues and assets, How to use Git and Azure DevOps tools (CI/CD) pipelines to manage and deploy the code(bot) to different environments. I also creates reusable components that are used across different teams (Located in Prague, Essen and London) to make bot development process faster

Other than UiPath tools, I am also working with Python, Power Query, Macros etc.

IaC

Besides RPA, I am also involved in infrastructure management where i design CI/CD pipelines to handle code deployment releases and monitoring of software in different environments(Testing, Stagging and Production).

[01/2019 – 07/2022]

Intelligent Automation Engineer(IA RPA)

MSD Czech Republic s.r.o

City: Prague

Country: Czechia

As an intelligent Automation specialist at MSD(Also referred to as Merck in US and Canada)), my job was to analyze, design , code and deploy software robots to automate repetitive, time consuming tasks for our customers. The job involved collaborating with different stakeholders within the company to ensure the delivery of the right solution to the customers. We were working in an agile squad with team consisting scrum master, project manager, process owners , business analysts , solution architects and Robotic Process Automation developers. The platform that we use is mainly UiPath, a tool based on C# programming language.

The business processes that we were automating touched on a different range of applications such as Excel, SAP , APPIAN, Blackline and many more

Apart from programming robots, I also performed code review for other developers and perform solution demos to business stakeholders. I worked with an international team with team members located in EMEA, APAC and Americas. In my job, I used CI/CD pipelines for code deployment, Git, Jira, Confluence and much more, Delivered documentations following SDLC concepts (software development lifecycle)
